

## INDUSTRY RESOURCES

### HIGG INDEX

Suite of tools developed by SAC and its members enabling brands, retailers, and facilities to measure social/labor and environmental sustainability performance

### PRODUCT TOOLS

Assess materials, gauges potential environmental impacts at the product design stage, and, eventually, to measure product environmental footprints

### FACILITY TOOLS

Allow facilities to self-declare their impacts and share with multiple customers or suppliers; results can be verified by a single third-party audit

### BRAND & RETAIL TOOLS

Used to help brands internal improvement efforts and to share with suppliers

### SCIENCE BASED TARGETS

Approves and tracks commitments to reduce greenhouse gases; apparel and footwear sector guidance on how to set targets for different types of emissions

### SUSTAINABILITY MEASUREMENT AND REPORTING SYSTEM

The Sustainability Consortium's toolkits identifying environmental and social issues and improvement opportunities for broad categories of consumer products

### ZDHC GATEWAY

Web-based tools by The ZDHC Foundation (zero discharge of hazardous chemicals) evaluating chemical formulations and wastewater
